Sounds like you agreed Mark is starting Monday rather than mobilizing.  
Rob and I looked at the I-beam at Gladstone. It is already cut in 17' lengths and would surely support the load. Problem?

Matt,

Regarding the decking approach to the portal gate, Will indicates that he needs this in-place by Monday AM. They plan to use this to place equipment for mucking. So, that needs to occur by this weekend. Mark and I discussed the potential of using some of the steel bar grate as decking; the key is load capacity with the planned span width.

Also, they both understand that we have the need to get our Water treatment system dialed in and sludge feed rate managed.

Steve
